---

Dear Recruiter,

I recently completed the IT Programmer program at College LaSalle in Montreal and am actively seeking IT positions, mainly in software development.

While my primary career goal is to secure a position in IT/Engineering, I understand the importance of supporting my family and am therefore open to considering any available positions. Additionally, I am in the process of obtaining my Post-Graduation Work Permit (PGWP), which enables me to work full-time in Canada.

Through my studies and professional experiences, I have developed strong programming skills in ASP.NET C#, PL/SQL, Python, Java, and Flutter/Dart during my internship. My background includes a bachelor's degree in Software Engineering from the State University of Ponta Grossa and Electrical Engineering from UNINTER in Brazil.

In my software development journey, I've had the opportunity to design business rules for multi-platform applications and work on responsive web development projects. I've also been involved in projects that required redesigning and recoding, which has sharpened my development skills and kept me up-to-date with the latest concepts.

One project I'm particularly proud of is an academic/startup initiative called Garbage Map (Mapa do Lixo). This initiative aimed to engage the local community in Goiania, GO, Brazil. I developed a multiplatform website and application to help report irregular waste disposal in the area.

I'm committed to continuing my development in the field, currently studying the IBM Data Science Program, and recently earned a Google IT Support certification. Additionally, I hold the Microsoft Certified Solutions Expert (MCSE) certification, which, though now retired, demonstrates my expertise in systems administration and technical support.

I'm enthusiastic about the possibility of joining your team and contributing my technical skills and passion for software development. My education and hands-on experience have prepared me to take on challenges and learn quickly.

Thank you for considering my application. I look forward to discussing how I can contribute to your team in an interview.

---

Sincerely,  
Francisco Ricardo Andraschko
